EP 66-182

SUBJECT: Inspection Report No. 2 - [REDACTED]

25X1A5a1

6. Project Status:

Most parts for final assembly of the transceiver have been received by [REDACTED]. The only items that may cause delay in this contract are the [REDACTED] cases and an RF choke which are in short supply. Mr. [REDACTED] has contacted Station [REDACTED] and has requested an extension until the middle of September 1966, to account for the late delivery of these components.

25X1A5a1

No technical problems have been encountered to date. A T&I man will be required at the [REDACTED] plant in the early part of September to establish test procedures for acceptance testing. As the contract is written, the first production unit must be accepted at the [REDACTED]. All remaining units will be shipped to [REDACTED] and will be inspected prior to entering into stock.
